## Water shortage

Prineville, Oregon

**On 05-15-07 it was determined that 3 of the City of Prineville's 9 water wells were not operating properly. As a result there is a concern that the City may not have the capacity to meet irrigation and other water demands. Water in some areas may appear cloudy, but has been tested and has been determined to be safe to drink. If concerns remain, boiling water is an effective way to ensure it is potable. Effective immediately we are asking everyone to stop irrigating with water provided by the City of Prineville and curb any unnecessary water consumption. More information will be made available at [www.cityofprineville.com](http://www.cityofprineville.com), as the situation develops.**
