STAFF REPORT

Prineville Planning Commission Staff Report

Date: June 20, 2017
File No.: AM-2017-100
Applicant/Owner: City of Prineville
Location: Citywide
Notice to DLCD: May 15, 2017
Newspaper Notice: Planning Commission Notice - June 9, 2017
Public Hearing: Planning Commission - June 20, 2017
Staff: Phil Stenbeck, Planning Director
Proposal: City of Prineville Water Master Plan update.

The Prineville City Council takes seriously the development of a water system for the City.

To this end, the City Council wants to ensure that investment and development of water resources for households and businesses within Prineville are supported by master planning so as to achieve the goal of having a dependable City water system and supply.

The City Council also takes seriously the quality of life in Prineville and to this end wishes to create a water system which supports quality of life and local business opportunities in a harmonious manner that preserves the history and character of Prineville.

To this end, the City Council has asked the City Engineer to update the City's Water Master Plan last updated in 2000 (City Water Facility Plan). The City Engineer Eric Klann has worked with engineering consultants on developing the master plan, Anderson Perry & Associates, DOWL, and GSI Water Solutions and is receiving grant funding support from the Oregon Department of Land Conservation and Development (DLCD).

A number of staff to staff meetings have occurred and there have been several Technical Advisory Committee (TAC) meetings as shown below:

- February 28, 2017 - TAC meeting #1.
- March 28, 2017 - Staff to staff meeting.
- April 25, 2017 - TAC meeting #2.
- May 23, 2017 - TAC meeting #3.
- June 20, 2017 - Planning Commission public hearing (recommendation to the City Council).

The draft master plan attached outlines the City's existing water facilities/resources and updates the 2000 plan. Staff requests that you provide a recommendation on adoption of the plan to the City Council.
